- ReactGitJestCSS
- JavaScriptTailwindcssGitHub
- GSAPWordPressTypeScript

Education

- 2012 - 2017

 **M.Sc. Agricultural Engineer**
Agricultural University of Athens
- 2022 - 2022

 **Front-End Engineer**
Codecademy

Languages

-  Greek – Native
-  English – Fluent (C2)
-  French – Independent (B2)

Summary

Aspiring web developer with a strong foundation in JavaScript, dedicated to building efficient and user-friendly web applications. My background in agricultural engineering has honed my ability to tackle complex problems with a systematic and creative approach. Passionate about continuous learning, I focus on mastering web development fundamentals to write clean, high-quality code.

Experience

-  Feb 2024 – Apr 2024 - **Frontend Developer**
Polyview Health Inc
 - Developed a high-converting landing page, increasing customer inquiries and engagement.
 - Translated Figma prototypes into a pixel-perfect web page, ensuring design accuracy.
 - Utilized Coda for project tracking, improving team communication and productivity.
 - Gathered and structured essential medical data from all U.S. states to build the core database powering the product.
-  Sep 2023 – Dec 2023 - **Frontend Developer Internship**
Wealthyhood
 - Gained hands-on experience working on a real-world React project.
 - Improved collaboration skills by working with GitHub version control.
 - Implemented key UI updates to enhance design consistency and user experience.

Notable Projects

- Furniro - Eshop**
Built with React, React Router, React Hook Form, and Tailwind CSS, this e-commerce platform enables users to create accounts, log in, favorite products, add items to a cart, and place orders. Additional features include a contact form, product details, and essential e-commerce information such as payment options and return policies.
 - Data Handling: Used the Fetch API to retrieve product data from DummyJSON.
 - Custom Hooks: Developed useHover() for hover detection and useOutsideClick() to handle external clicks. Also created a custom hook to enhance Tailwind’s responsive behavior.
 - Navigation: Ensured smooth transitions and dynamic routing using React Router.
 - Data Persistence: Leveraged local storage for managing user credentials, cart items, favorites, app theme, and order history.
- A Landing Page for a law firm**
Built with HTML, CSS, and JavaScript, this project converts a Figma design into a fully responsive and pixel-perfect landing page.
 - Animations & Interactivity: Enhanced user engagement with GSAP and the Web Animations API.
 - Responsive Design: Applied modern CSS and JavaScript techniques to ensure seamless adaptability across devices.This project strengthened my ability to translate designs into functional, responsive web pages with a strong focus on detail and user experience.
